## **DETAILED ACTION**

### ***Allowable Subject Matter***

The following is an examiner's statement of reasons for allowance:

Claim 1 recites a dual-band antenna comprising a multi-layer substrate including at least a first substrate and a second substrate, a first metal strip formed on the first substrate and including a first feeding end and a first open circuit end, a second metal strip formed on the second substrate and including a second feeding end, a vortical structure and a second open circuit end, wherein the second feeding end connects the first metal strip through a first conductive via, and a sleeve structure formed on the multi-layer substrate by skirting the first metal strip for increasing the bandwidth of a second frequency.

Claim 7 recites a dual-band antenna comprising a multi-layer substrate including at least a first substrate and a second substrate, a first metal strip including a plurality of upper metal strips formed on the first substrate, a plurality of lower metal strips formed on the second substrate, a first feeding end, and a first open circuit end, a second metal strip formed on the second substrate, and including a second feeding end, a vortical structure and a second open circuit end, wherein the second feeding end connects the first metal strip through a first conductive via, wherein a first frequency is resonated by the strip between the first feeding end and the second open circuit end, and the second frequency is resonated by the strip between the first feeding end and the first open circuit end.

None of prior art shows or suggests these antenna devices.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
